

Why Collaborative Practice?

Effective collaboration is essential in today's health care environment to meet the increasingly complex needs of patients and families. Data in the scientific literature suggests that meaningful collaboration between the patient's physician and the patient's case manager can positively influence appropriate access to health services, cost, and quality of care.

This conference is designed to provide case managers with insights on integrating a collaborative mindset into everyday practice.

The goal is to help the case manager better serve as a catalyst for quality, cost-effective care by linking the patient, the physician, other members of the care coordination team, the payer, and the community.

Continuing Education Credits

CCMs: 6.0 clock hours have been applied for.

RNs: 7.5 contact hours CNE have been applied for.

This program is made possible by the generous support from the following sponsors:

About CMSA

CMSA is an international, non-profit professional association founded in 1990 dedicated to the support and development of the profession of case management through educational forums, networking opportunities and legislative involvement.

Unique in its composition as an international organization, with nearly 10,000 members and 70+ affiliated chapters, CMSA's success and strength is its structure as a **member-driven society**. The mission of CMSA is to **"positively impact and improve patient wellbeing and healthcare outcomes."** For more information, visit www.cmsa.org.
